

XPS 15 Your very own digital canvas.

XPS empowers your passions. XPS represents high performance and leading technology. The line embodies uncompromised form and function and is thoughtfully designed to be both functional and beautiful.

Crafted without compromise.

The stunning overall design of the XPS 15 is a side effect of careful performance driven construction. Machined aluminum provides strength and durability. The top cover is precision cut from a single block of aluminum. The base is surrounded with a ring of precision cut anodized aluminum to match the display back. The silicone base feels cooler to the touch than aluminum. Finally, the edge-to-edge hardened Corning® Gorilla® Glass is bonded to the aluminum display back and is impeccably strong and aesthetically pleasing.

Picture perfect.

The standard full high definition display provides stunning visuals. View your movies or edit and create content with the benefit of a brilliant full high-def screen with 350-nit brightness. That's up to 75% brighter than your average panel.
