

# HUAWEI AR530 Series Agile Gateway Brochure

# Overview

The AR530 series agile gateways, named industrial switching routers, are designed to work in harsh environments of Internet of Things (IoT) applications. They integrate routing, switching, security, and Advanced Metering Infrastructure (AMI) functions and provide various extensions.

The AR530 is available in the following models: AR531-2C-H, AR531-F2C-H, AR531GR-U-H, AR531GPe-U-H and AR531G-U-D-H.

AR531-2C-H

AR531-F2C-H

AR531GR-U-H

AR531GPe-U-H

AR531G-U-D-H

# Key Features and Values

## Applications Integrated in One Device, Reducing Total Cost of Operation

- Integrates routing and data collection functions and provides various types of interfaces, such as FE, GE, 3rd Generation (3G), Power Line Carrier (PLC), Radio Frequency (RF), ZigBee and RS485.
- Supports switching and Smart Ethernet Protection (SEP), implementing millisecond-level protection switch-over.
- Has a built-in, zone-based firewall, ensuring production security.

## Better Experience with Industry-class Design

- Complies with substation environment standard IEC61850-3/IEEE1613.
- Provides IP51 and is dustproof and waterproof.
- Uses a fanless design and works in a wide temperature range.
- Works normally in environments that have strong electro-magnetic interference.
- Huawei-developed PLC technology with multi-carrier modulation of Orthogonal Frequency Division Multiplexing (OFDM), allowing Megabit-level transmission rate.

## Open Interface to Improve IoT Applications Integration

- Open protocol standards: Complies with IEC 62056 (DLMS/COSEM), Modbus, and inter-operates easily with other devices.
- Flexible configuration and management: flexibility to configure data collection services of IoT terminals to meet customized user requirements.

# Typical Applications

# Product Specifications

The following table lists the specifications of the AR530.

| Specifications            | AR531-2C-H   | AR531-F2C-H  | AR531GR-U-H   | AR531GPe-U-H   | AR531G-U-D-H             |
|---------------------------|--|--|---|--|--------------------------|
| Hardware Specifications   |  |  |   |  |                          |
| L2 Switching Capacity     | 5.6Gbps  | 5.6Gbps  | 5.2Gbps   | 5.2Gbps  | 5.2Gbps                  |
| L2 Forwarding Performance | 4.2Mpps  | 4.2Mpps  | 3.9Mpps   | 3.9Mpps  | 3.9Mpps                  |
| WAN Speed With Services   | 150 Mbps   | 150 Mbps   | 150Mbps   | 150Mbps  | 150Mbps                  |
| Fixed Ethernet Interface  | 2 x GE SFP + 6 x FE RJ45 + 2 x FE combo                            | 2 x GE SFP + 6 x FE SFP + 2 x FE combo                             | 2 x GE SFP + 6 x FE RJ45  | 2 x GE SFP + 6 x FE RJ45   | 2 x GE SFP + 6 x FE RJ45 |
| RS485 Interface           | 2-channel  | 2-channel  | 2-channel   | 2-channel  | 2-channel                |

| Software Specifications           |   |             |             |              |              |
| Industrial Communication Protocol | IEC62056, Modbus  |             |             |              |              |
| Basic Features                    | DHCP server/client/relay, PPPoE server/client, NAT, sub-interface management  |             |             |              |              |
| LAN                               | IEEE 802.1p, IEEE 802.1q, IEEE 802.3, VLAN management, MAC address management   |             |             |              |              |
| Ring Network Protocols            | SEP, STP, RSTP, MSTP  |             |             |              |              |
| IPv4 Routing                      | Routing policies, static routes, RIP, OSPF, IS-IS, BGP  |             |             |              |              |
| IPv6 Routing                      | Routing policies, static routes, RIPng, OSPFv3, IS-ISv6, BGP4+  |             |             |              |              |
| Multicast                         | IGMP v1/v2/v3, PIM SM, PIM DM, MSDP   |             |             |              |              |
| VPN                               | IPSec VPN, GRE VPN, DSVPN, L2TP VPN   |             |             |              |              |
| QoS                               | Differentiated service model, priority mapping, traffic policing (CAR), traffic shaping, congestion avoidance (IP-precedence/DSCP-based WRED), congestion management (LAN interfaces: SP/WRR/SP+WRR; WAN interfaces: PQ/CBWFQ), MQC (traffic classifier, traffic behavior, and traffic policy), HQoS, Smart Application Control (SAC) |             |             |              |              |
| Security                          | Access Control List (ACL), firewall, 802.1x authentication, AAA authentication, RADIUS authentication, HWTACACS authentication, broadcast storm suppression, ARP security, ICMP attack defense, Unicast Reverse Path Forwarding (URPF), CPCAR, Public Key Infrastructure (PKI)  |             |             |              |              |
| Management and Maintenance        | Upgrade management, device management, SNMP (v1/v2c/v3), RMON, NTP, USB-based deployment, network configuration, CLI  |             |             |              |              |
