

XPS 13 Compact package. Infinite possibilities.

XPS empowers your passions. XPS represents high performance and leading technology. The line embodies uncompromised form and function and is thoughtfully designed to be both functional and beautiful.

Powerful design. Deceptively small.

We cleverly fit a stunning 13.3" edge-to-edge display with durable Gorilla Glass designed for brilliant visuals in an compact body similar to an 11" laptop. It's not just magic, it's smart design.

So much punch, so little effort.

The XPS 13 packs a 2nd generation Intel® processor up to Core™ i7 and Intel HD 3000 Graphics into its slim frame (6-18mm). And here's the kicker, it weighs as little as 2.99 lbs.*

Always ready to go.

With solid state drives and Intel® Rapid Start Technology, the XPS 13 boots from cold in 8 seconds or less. And whatever state its in, it comes back in a snap, less than 1 second when it's in sleep mode and less than 4 seconds from deep sleep. The XPS 13 is one of the first systems with Intel® Smart Connect Technology which keeps your content updated* to be ready when you are.

Crafted without compromise.

The sleek and beautiful overall design is a side effect of careful performance driven construction. Machined aluminum provides strength and durability. The top cover is precision cut from a single block of aluminum. The base is surrounded with a ring of precision cut anodized aluminum to match the display back. The carbon fiber composite base helps drive its lightness. Its strong like aluminum, and thin, but feels cooler to the touch. Finally, the edge-to-edge hardened Gorilla Glass is bonded to the aluminum display back is impeccably strong and aesthetically pleasing.

Enterprise-friendly.

Dell has made it easier for IT departments to choose laptops that offer the security and services they value in a fit and finish executives and employees on the go now demand. Optional enterprise-friendly features include Trusted Platform Module for BitLocker Data Encryption, ProSupport™* and Configuration Services such as static imaging and asset tagging.

Intel® Smart Connect Technology: WiFi enabled connection required. System must be on or in sleep mode with application running to update.

Hard Drives: GB means 1 billion bytes and TB equals 1 trillion bytes; actual capacity varies with preloaded material and operating environment and will be less.

Memory: Graphics & System Memory: GB means 1 billion bytes and TB equals 1 trillion bytes; significant system memory may be used to support graphics, depending on system memory size and other factors.

Intel Wireless Display: Requires an Intel® Centrino® Wireless-N 1000 or Centrino® Advanced N 6230 wireless card, a Netgear PTV1000 Push2TV Media Adapter (sold separately), and an HDMI or composite AV-enabled display.

Wireless connectivity: Where wireless access is available. Additional access charges apply in some locations.

Notebook Weight: Weights vary depending on configuration and manufacturing variability.

Skype: Skype service subject to third-party service subscription terms and conditions.

Battery life: Tested system equipped with 6-cell battery, 4GB memory, Intel HD 3000 graphics, Intel Core i5-2467M, and 128GB solid state drive. Based on testing using the Mobile Mark 2007 battery life benchmark test. For more information about this benchmark test, visit www.bapco.com. Test results should be used only to compare one product with another and are not a guarantee you will experience the same battery life. Battery life may be significantly less than the test results and varies depending on your product's configuration, software, usage, operating conditions, power management settings and other factors. Maximum battery life will decrease with time and use.

ProSupport: Availability and terms of Dell Services vary by region. For more information, visit www.dell.com/servicedescriptions.
