

XPS 14 Designed to go the distance.

XPS empowers your passions. XPS represents high performance and leading technology. The line embodies uncompromised form and function and is thoughtfully designed to be both functional and beautiful.

Crafted without compromise.

The stunning overall design of the XPS 14 is a side effect of careful performance driven construction. Machined aluminum provides strength and durability. The top cover is precision cut from a single block of aluminum. The base is surrounded with a ring of precision cut anodized aluminum to match the display back. The silicone base feels cooler to the touch than aluminum. Finally, the edge-to-edge hardened Corning® Gorilla® Glass is bonded to the aluminum display back and is impeccably strong and aesthetically pleasing.

More hours in your day.

Keep watching, sharing, and working with up to 10 hours battery life*. The XPS 14 was designed to go the distance with a large 69Whr battery* that will keep you productive day or night.

*Battery is built-in to the laptop and is not replaceable by the customer

Now anywhere is a hotspot.

The search for Wi-Fi is over. Connect virtually anywhere, anytime with optional integrated mobile broadband*. And with Dell NetReady, you can pay as you go without any long term contracts. The display back was designed with a premium full grain leather so there is no signal interference with your built-in antennas.

Keep it real.

Enjoy lifelike visuals with powerful NVIDIA graphics paired with a brilliantly bright HD+ display. Enjoy smooth web browsing, responsive applications, and highly detailed gaming with NVIDIA® GeForce® dedicated graphics. The 400-nit display is up to 100% brighter than your average panel, making it ideal viewing movies or web content wherever you are, including the great outdoors.

XPS

XPS 14 Designed to go the distance.

Size meets speed.

Enjoy a 500GB* hard drive large enough to store your files on the go, and enjoy the responsiveness of an optional solid state drive.

Wakes fast.

The XPS 14 Ultrabook™ with an optional solid state drive and Intel® Rapid Start Technology* wakes up within seconds, ready to jump right back into everything you were doing when you closed the lid. This enables it to resume in a flash when you're ready, and ultra-low power consumption when you close the lid for standby mode.

Thinks fast.

Get fast access to your favorites with an added mSATA SSD and Intel® Smart Response Technology*. It quickly recognizes and caches your most frequently used files and applications, allowing you to access them right away.

Amazing performance at its best.

New 3rd Generation Intel® Core™ processors up to Core™ i7 deliver performance for your most demanding tasks.

IT-friendly.

Dell has made it easier for IT departments to choose laptops that offer the security and services they value in a fit and finish executives and employees on the go now demand. Optional enterprise-friendly features include Trusted Platform Module for BitLocker Data Encryption, ProSupport™* and Configuration Services such as static imaging and asset tagging.

battery life: Tested system equipped with 8GB memory, NVIDIA GeForce GT 630M graphics, Intel Core i7-3517U, 500GB hard drive and 32GB mSATA SSD. Based on testing using the Mobile Mark 2007 battery life benchmark test. For more information about this benchmark test, visit www.bapco.com. Test results should be used only to compare one product with another and are not a guarantee you will experience the same battery life. Battery life may be significantly less than the test results and varies depending on your product's configuration, software, usage, operating conditions, power management settings and other factors. Maximum battery life will decrease with time and use.
